

Measuring for Custom Type #5

If you have a long stair with an uneven amount of steps you have two choices:

**5A - Pick upper or lower center step to put a regular height center post.
No extra charge for this option
If you want this option take your 2 nose to nose measurements and any overhang, count your steps, then give us a call.**

5B - Center the middle post which adds extra height and requires extra charge

If you want this option take your nose to nose and any overhang measurements, count your steps, then carefully measure each rise and run (very few stairs are exactly the same on all) then give us a call.

We will have to draw your stairs to find the center spot for your middle post, so we need these extra measurements

*** If you can e-mail a picture - that is very helpful ***
